Hello Homeowners & Residents,

We want to make you aware of an upcoming adjustment to the irrigation system along Tower Ranch Boulevard.

It has been brought to our attention that the boulevard irrigation has been operating at “normal” watering levels, resulting in the grass maintaining a healthy green appearance. However, these watering levels currently exceed what is permitted under the City’s current Stage 2 water restrictions.

Effective today, August 26, the irrigation schedule along Tower Ranch Boulevard will be adjusted to bring it in line with the current Stage 2 water restrictions.

As a result, residents may notice the boulevard grass becoming less green or beginning to turn brown. This is an expected consequence of complying with the water restrictions and conserving water—not an indication that the boulevard is being neglected.

Given the ongoing drought conditions, it is important that we all do our part to conserve water and comply with the restrictions, particularly given the potential penalties associated with non-compliance.

We wanted to provide this information in advance so residents understand why the appearance of the boulevard may change.

Thank you for your understanding and cooperation as we work together to conserve water during these exceptional conditions.
